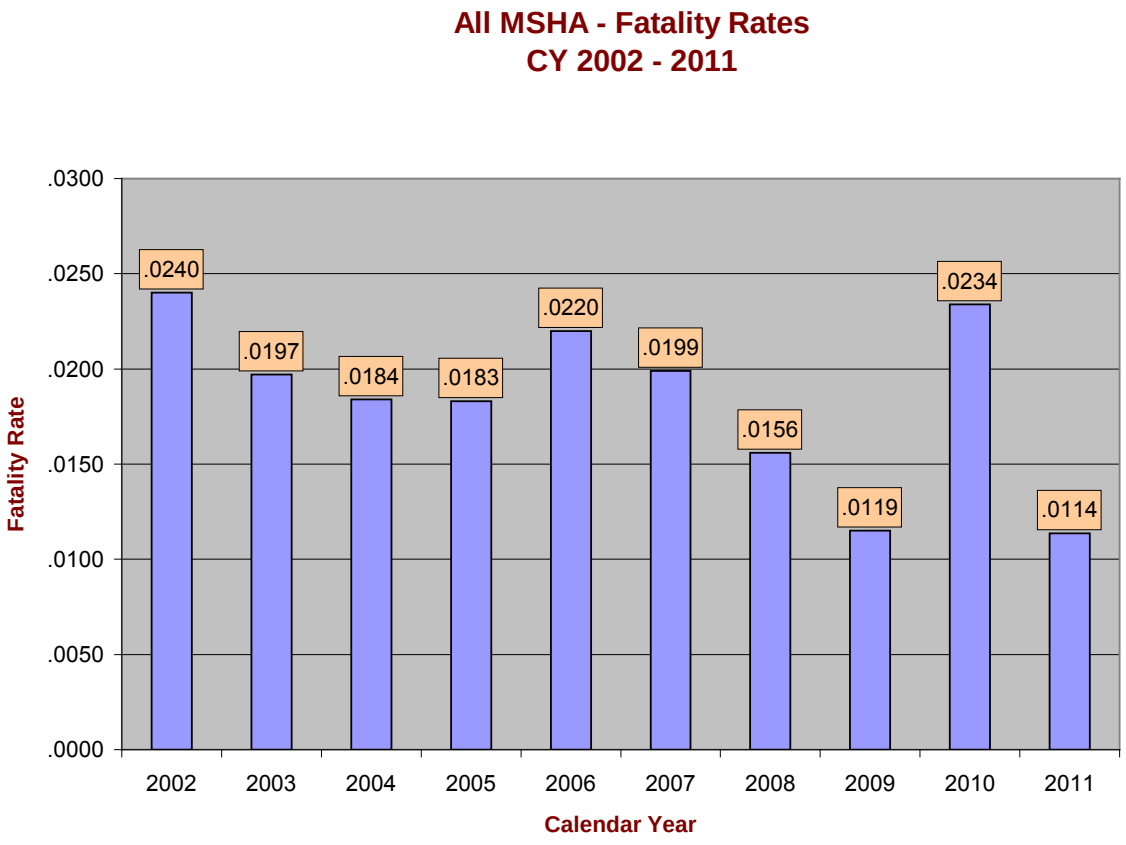
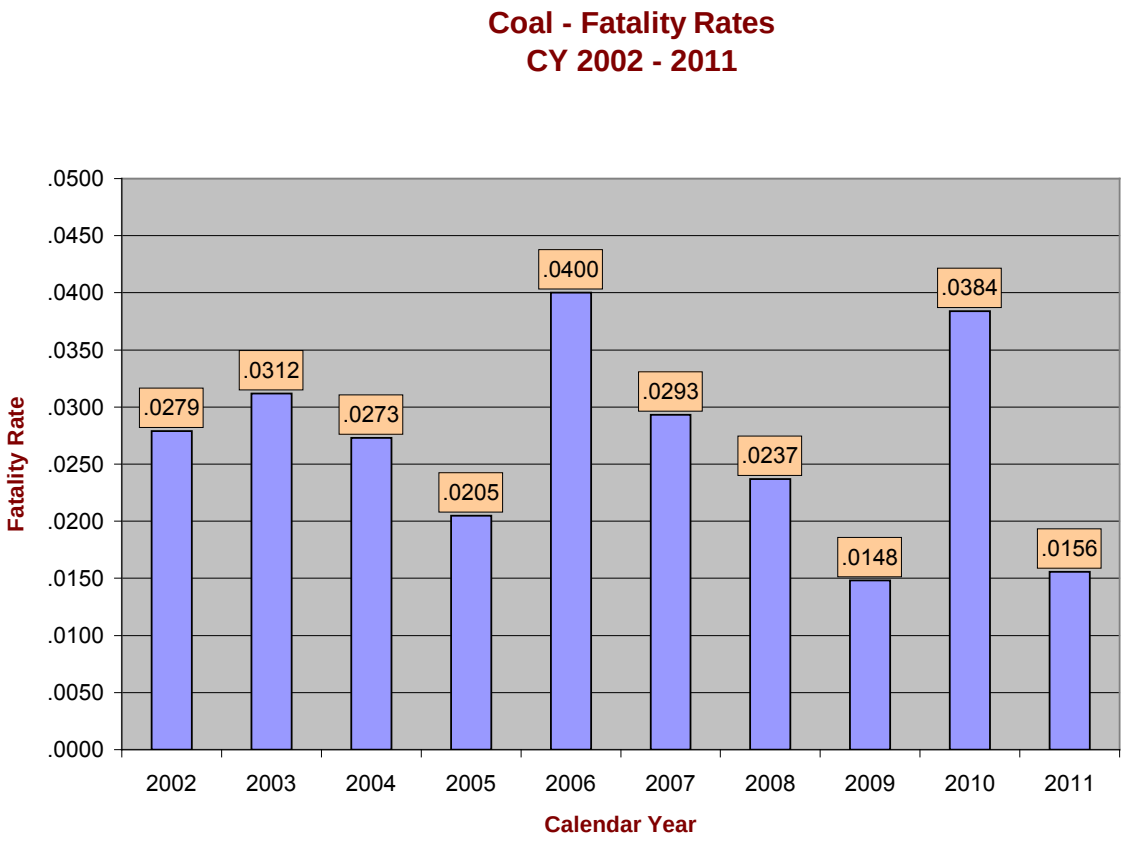
MSHA FACT SHEET:
Mine Fatality Rate[1]
Both Coal and Metal/Non Metal Mines
CY 2002 – CY 2011



- The Fatality Rate decreased 53 percent from .0240 in CY 2002 to .0114 in CY 2011.
- The Fatality Rate decreased 48 percent from .0220 in CY 2006 to .0114 in CY 2011.

[1] Reported injuries per 200,000 hours worked.

MSHA FACT SHEET:
Mine Fatality Rate[1]
Coal Mines
CY 2002 – CY 2011

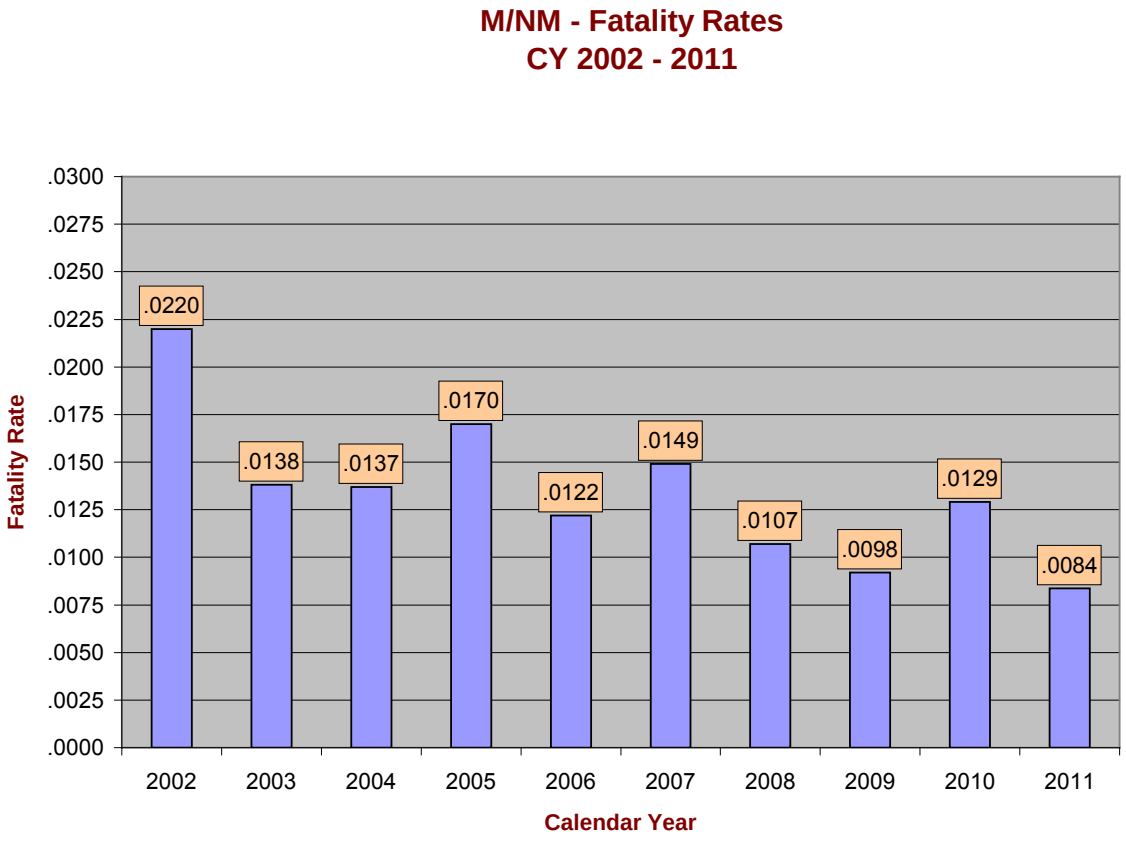


- The Fatality Rate for Coal mines decreased 44 percent from .0279 in CY 2002 to .0156 in CY 2011.

- The Fatality Rate for Coal mines decreased 61 percent from .0400 in CY 2006 to .0156 in CY 2011.

[1] Reported injuries per 200,000 hours worked.

MSHA FACT SHEET:
Mine Fatality Rate[1]
Metal/Non Metal Mines
CY 2002 – CY 2011



- The Fatality Rate for MNM mines decreased 62 percent from .0220 in CY 2002 to .0084 in CY 2011.

- The Fatality Rate for MNM mines decreased 31 percent from .0122 in CY 2006 to .0084 in CY 2011.

[1] Reported injuries per 200,000 hours worked.
