

Fatality Alert

MINE FATALITY – On July 26, 2023, a miner suffered serious injuries when he lost control of the pickup truck as it ascended a haul road. The victim died several months later from his injuries.

Best Practices

- Perform pre-operational examinations of mobile equipment.
- Maintain control of self-propelled mobile equipment while it is in motion.
- After repair and maintenance, ensure mobile equipment is safe to operate.
- Always wear a seatbelt and remain in the cab with your seatbelt on while operating mobile equipment. Never attempt to exit or jump from an out-of-control vehicle.

This is the 40th fatality reported in 2023, and the tenth classified as “Powered Haulage”.

The information provided in this notice is based on preliminary data only and does not represent final determinations regarding the nature of the incident or conclusions regarding the cause of the fatality.
