

MSHA's Accident Prevention Program Miner's Tip

Safety and
Health are
Values!

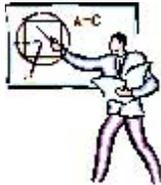

"Creating Understanding"

Mine Type: **All**
Category(s): **Training**

With so many new and former miners coming into the mining industry today, we might assume some of the more "experienced" miners know how to do a task safely. We need to remember that some returning miners have been out of the industry for years. There are three easy steps to follow when orienting miners regardless of the amount of experience they have.

Tell them - *"They may forget"*

Show them - *"They might remember"*

Involve them - *"They will understand"*
