The operator's record of the results of the weekly electrical examination of the HG-22 (#1) Section fails to reflect that the spare Scoop Batteries (128 volt D.C.) fails to reflect they were examined by a Qualified Electrician during the week prior to 04.05.2010. These batteries are Approved as per 30 C.F.R. Part 7 to be used on Permissible equipment, therefore they must be maintained as per approval. These batteries are charged off the equipment.

The HG-22 Section was affected by an explosion on 04.05.2010. Upon investigation of electrical equipment, following the explosion, the high number of similar citations/Orders indicate the Operator's serious lack of reasonable care for an agent of the Operator to do a weekly electrical examination and to maintain the electrical equipment in a safe operating
