* Enhance the quality, utility, and clarity of the information to be collected; and
* Minimize the burden of the information collection on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions: At this time, the Department of Labor is requesting clearance for site visit data collection for the Evaluation of the Army Unemployment Compensation for Ex-Servicemembers (UCX) Claimants Initiative.

Type of Review: New information collection request.
OMB Control Number: 1205–0NEW.
Affected Public: Staff associated with implementing the Army UCX Claimants Initiative in four states.
Frequency: Once.
Total Responses: 40.
Average Time per Response: 45 minutes.
Estimated Total Burden Hours: 30 hours.
Total Burden Cost: $0.

Comments submitted in response to this request will be summarized and/or included in the request for Office of Management and Budget approval; they will also become a matter of public record.

Signed at Washington, DC, this day of June 5, 2013.
James H. Moore, Jr.,
Deputy Assistant Secretary for Policy, U.S. Department of Labor.

BILLING CODE 4510–24–P

DEPARTMENT OF LABOR
Office of the Secretary

All Items Consumer Price Index for All Urban Consumers; United States City Average

Pursuant to Section 112 of the 1976 amendments to the Federal Election Campaign Act (Pub. L. 94–283, 2 U.S.C. 441a (c)(1)–(2), the Secretary of Labor has certified to the Chairman of the Federal Election Commission and publishes this notice in the Federal Register that the United States City Average All Items Consumer Price Index for All Urban Consumers (1967=100) increased 365.6 percent from its 1974 annual average of 147.7 to its 2012 annual average of 687.761 and that it increased 29.7 percent from its 2001 annual average of 530.4 to its 2012 annual average of 687.761. Using 1974 as a base (1974=100), I certify that the United States City Average All Items Consumer Price Index for All Urban Consumers thus increased 365.6 percent from its 1974 annual average of 100 to its 2012 annual average of 465.647. Using 2001 as a base (2001=100), I certify that the United States City Average All Items Consumer Price Index for All Urban Consumers increased 29.7 percent from its 2001 annual average of 100 to its 2012 annual average of 129.668. Using 2006 as a base (2006=100), I certify that the CPI increased 13.9 percent from its 2006 annual average of 100 to its 2012 annual average of 113.887.

Signed at Washington, DC, on the 21 day of May 2013.
Seth D. Harris,
Acting Secretary of Labor.

BILLING CODE 4510–24–P

DEPARTMENT OF LABOR

Office of the Secretary

Mineral Safety and Health Administration

Proposed Collection; Comment Request; Program to Prevent Smoking in Hazardous Areas (Pertains to Underground Coal Mines)

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: 60-Day Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to assure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

DATES: All comments must be postmarked or received by midnight Eastern Standard Time on August 12, 2013.

ADDRESSES: Comments concerning the information collection requirements of this notice must be clearly identified with “OMB 1219–0041” and sent to the Mine Safety and Health Administration (MSHA). Comments may be sent by any of the methods listed below.

FOR FURTHER INFORMATION CONTACT: Sheila McConnell, Deputy Director, Office of Standards, Regulations, and Variances, MSHA, at McConnell.Sheila.A@dol.gov (email); 202–693–9440 (voice); or 202–693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 317(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 877(c), and 30 CFR 75.1702 prohibits persons from smoking or carrying smoking materials underground or in places where there is a fire or explosion hazard. Under the Mine Act, 30 U.S.C. 877(c) and 75.1702, coal mine operators are required to develop programs to prevent persons from carrying smoking materials, matches, or lighters underground and to prevent smoking in hazardous areas, such as in or around oil houses, explosives magazines or other areas where such practice may cause a fire or explosion.

Section 75.1702–1 requires that the mine operator submit the program...
Supporting Statement for
Paperwork Reduction Act Submissions

OMB Control Number: 1219 - 0041

OMB Information Collection Title: Program to Prevent Smoking in Hazardous Areas (Pertains to Underground Coal Mines)

Form Number(s): None

Authority: 30 CFR 75.1702 and 75.1702-1

General Instructions

A Supporting Statement, including the text of the notice to the public required by 5 CFR 1320.5(a)(i)(iv) and its actual or estimated date of publication in the Federal Register, must accompany each request for approval of a collection of information. The Supporting Statement must be prepared in the format described below, and must contain the information specified in Section A below. If an item is not applicable, provide a brief explanation. When Item 17 or the OMB Form 83-I is checked “Yes”, Section B of the Supporting Statement must be completed. OMB reserves the right to require the submission of additional information with respect to any request for approval.

Specific Instructions

A. JUSTIFICATION

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.

Section 317(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. § 877(c), and 30 CFR 75.1702 prohibits persons from smoking or carrying smoking materials underground or in places where there is a fire or explosion hazard. Under the Mine Act, 30 U.S.C § 877(c) and § 75.1702, coal mine operators are required to develop programs to prevent persons from carrying smoking materials, matches, or lighters underground and to prevent smoking in
hazardous areas, such as in or around oil houses, explosives magazines or other areas where such practice may cause a fire or explosion.

Section 75.1702-1 requires a mine operator to submit a smoking prevention program to MSHA for approval. Section 103(h) of the Mine Act, 30 U.S.C. § 813, authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. This information collection requirement helps to ensure that a fire or explosion hazard does not occur.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

MSHA uses the information to determine a mine operator’s compliance with the standard to institute a smoking prevention program that ensures persons entering the underground area of the mine do not carry smoking materials, matches, or lighters.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.

No improved information technology has been identified that would reduce the burden. The smoking prevention program is a written description prepared for and approved by the MSHA District Manager. The smoking prevention program describes the frequency, locations and methods of searches conducted to prevent the intentional or inadvertent carrying of smoking materials into an underground coal mine.

The program can be prepared using word processing programs and submitted via e-mail, where the mine operator has the capability of affixing transmittable authorization signatures or where the e-mail or facsimile is followed by a signed hard copy. Email submissions occur approximately five percent of the time.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

There is no similar or duplicate information. MSHA approves a smoking prevention program on a mine-by-mine basis. Where State agencies require a smoking prevention program, MSHA will accept the same program if the program
satisfies the requirements of the § 75.1702.

5. If the collection of information impacts small businesses or other small entities (Item 5 of OMB Form 83-I), describe any methods used to minimize burden.

This information does not have a significant impact on small businesses or other small entities.

6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

MSHA would not be able to enforce this standard if MSHA did not collect this information.

7. Explain any special circumstances that would cause an information collection to be conducted in a manner:

- requiring respondents to report information to the agency more often than quarterly;
- requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
- requiring respondents to submit more than an original and two copies of any document;
- requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;
- in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;
- requiring the use of a statistical data classification that has not been reviewed and approved by OMB;
- that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or
• requiring respondents to submit proprietary trade secret, or other
confidential information unless the agency can demonstrate that it
has instituted procedures to protect the information’ confidentiality
to the extent permitted by law.

For the life of all underground coal mines, an approved smoking prevention
program is required. A smoking prevention program must be submitted for
approval in accordance with § 75.1721(b)(9) prior to the opening of a new
underground coal mines, or the reopening and reactivating of abandoned or
deactivated coal mines. Once submitted and approved, a revised smoking
prevention program is only required where the mine ownership changes or the
smoking prevention program proves inadequate to prevent miners from bringing
smoking articles underground. This collection of information is otherwise
consistent with the guidelines in 5 CFR 1320.5.

8. If applicable, provide a copy and identify the data and page number of
publication in the Federal Register of the agency’s notice, required by 5
CFR 1320.8(d), soliciting comments on the information collection prior to
submission to OMB.

In accordance with 5 CFR 1320.8 (d), MSHA will publish the proposed
information collection requirements in the Federal Register, notifying the public
that these information collection requirements are being reviewed in accordance
with the Paperwork Reduction Act of 1995, and giving interested persons 60
days to submit comments.

9. Explain any decision to provide any payment or gift to respondents,
other than remuneration of contractors or grantees.

MSHA does not provide payments or gifts to respondents.

10. Describe any assurance of confidentiality provided to respondents and
the basis for the assurance in statute, regulation, or agency policy.

There is no assurance of confidentiality provided to respondents.

11. Provide additional justification for any questions of a sensitive nature,
such as sexual behavior and attitudes, religious beliefs, and other matters
that are commonly considered private. This justification should include the
reasons why the agency considers the questions necessary, the specific
uses to be made of the information, the explanation to be given to persons
from whom the information is requested, and any steps to be taken to
obtain their consent.
There are no questions of a sensitive nature.

12. Provide estimates of the hour burden of the collection of information. The statement should:

- Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.

- If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB Form 83-I.

- Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included in Item 13.

**Hour Burden**

MSHA maintains a database that records the submission and approval of smoking prevention programs required under §§ 75.1702 and 75.1702-1. A smoking prevention program remains in effect for the life of the mine; therefore, the number of annual responses is limited to programs developed for new mines or mines changing ownership. In FY 2012, there were 97 new smoking prevention programs approved by MSHA under this standard. MSHA estimates that it takes a mine operator approximately 30 minutes (0.5 hour) to develop a smoking prevention program.

\[
97 \text{ plans} \times 0.5 \text{ hour per program} = 49 \text{ hours}
\]

**Hour Burden Cost**

MSHA estimates that a mine foreman prepares the program at a wage of $89.72 per hour. The wage rate used in this information collection is from the U.S. Coal Mines Salaries, Wages, and Benefits – InfoMine 2011 Survey Results.

\[
49 \text{ hours} \times $89.72 \text{ per hour} = $4,396
\]
13. Provide an estimate of the total annual cost burden to respondents or recordkeepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14).

- The cost estimate should be split into two components: (a) a total capital and start-up cost component (annualized over its expected useful life); and (b) a total operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information. Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.

- If cost estimates are expected to vary widely, agencies should present ranges of cost burdens and explain the reasons for the variance. The cost of purchasing or contracting out information collection services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection, as appropriate.

- Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information or keep records for the government, or (4) as part of customary and usual business or private practices.

MSHA estimates that there are no additional costs associated with submission of a smoking prevention program. MSHA’s experience is that a smoking prevention program is relatively straightforward, requiring minimal effort, and a respondent typically submits the plan along with other mandatory plans; therefore, mailing or processing costs are not incurred by the mine operator.

14. Provide estimates of annualized cost to the Federal government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment,
overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from Items 12, 13, and 14 in a single table.

MSHA's records show that in FY 2012 it received approximately 97 new smoking prevention programs. MSHA estimates a GS-12 earning $50.39 per hour needs about 30 minutes (0.5 hour) to review and to approve a smoking prevention program. (Federal wage rate data comes from OPM Fedscope employment data 2012 and includes benefits.)

\[
97 \text{ programs} \times 0.5 \text{ hour} \times $50.39 \text{ per hour} = $2,444
\]

15. Explain the reasons for any program changes or adjustments reporting in Items 13 or 14 of the OMB Form 83-I.

Adjustments are as follows: there was a decrease in the total number of programs submitted (144 to 97) resulting in a decrease of 23 burden hours (from 72 to 49). A corresponding decrease occurred in the number of respondents and responses (144 to 97).

16. For collections of information whose results will be published, outline plans for tabulation, and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.

MSHA does not intend to publish the results of this information collection.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

This collection does not seek approval to not display the expiration date for OMB approval. There are no forms associated with this information collection on which to display the OMB number and expiration date.

18. Explain each exception to the certification statement identified in Item 19, "Certification for Paperwork Reduction Act Submission," of OMB 83-I.

There are no certification exceptions identified with this information collection.
B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS

When Item 17 on the Form OMB 83-I is checked “Yes”, the following documentation should be included in the Supporting Statement to the extent it applies to the methods proposed:

There is no statistical methodology involved in this collection.
