CSR inventory and malfunctions; retention of SCRS.

DATES: All comments must be received by midnight Eastern Standard Time on February 15, 2011.

ADDRESSES: Comments must clearly be identified with the rule title and may be submitted to MSHA by any of the following methods:

(1) Electronic mail: zzMSHA-Comments@dol.gov.
(2) Facsimile: (202) 693–9441.

FOR FURTHER INFORMATION CONTACT:
Mario Distasio, Chief of the Economic Analysis Division, Office of Standards, Regulations, and Variances, MSHA, at distasio.mario@dol.gov (e-mail), 202–693–9445 (voicemail), 202–693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background
Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813, authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners.

Title 30, CFR 75.1714–3 requires that self-rescue devices be inspected for damage after being worn or carried, and be tested regularly at intervals not to exceed 90 days by a qualified person who certifies by date and signature that the tests were conducted. A self-rescue device must be removed from service if its seal is broken, it is damaged so that it will not function properly, or it does not meet testing criteria. A record must be made when a self-rescue device is removed from service and when corrective action is taken as a result of an inspection or test. The records are used as an enforcement tool to assure that the self-rescue devices have been tested and inspected and are maintained in operable condition. In the event of a mine fire, mine explosion, or mine inundation, the use of self-rescuers can be the difference between life and death. Therefore it is essential that these devices be examined regularly and that they are maintained in usable and operative condition.

II. Desired Focus of Comments
MSHA is particularly interested in comments that:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
• Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
• Enhance the quality, utility, and clarity of the information to be collected; and
• Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the FOR FURTHER INFORMATION CONTACT section of this notice, or viewed on the Internet by selecting “Rules &Regs”, and then selecting “FedReg.Docs”. On the next screen, select “Paperwork Reduction Act Supporting Statement” to view documents supporting the Federal Register notice.

III. Current Actions
This request for collection of information contains notification and recordkeeping provisions for the Proposed Information Collection Request Submitted for Public Comment and Recommendations, 30 CFR 75.1714–3–Self-rescue devices; inspection, testing, maintenance, repair and recordkeeping, 30 CFR 75.1714–4 Additional self-contained self-rescuers (SCSRs), 30 CFR 75.1714–8 Reporting SCSR inventory and malfunctions; retention of SCRS. MSHA does not intend to publish the results from this information collection and is not seeking approval to either display or not display the expiration date for the OMB approval of this information collection.

There are no certification exceptions identified with this information collection and the collection of this information does not employ statistical methods.

Type of Review: Extension.
Agency: Mine Safety and Health Administration.
OMB Number: 1219–0044.
Frequency: On Occasion.
Affected Public: Business or other for-profit.
Cost to Federal Government: $0.00.
Total Burden Respondents: 595.
Total Number of Responses: 754,932.
Total Burden Hours: 12,664.

Total Hour Burden Cost (operating/maintaining): $1,072,641.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Patricia W. Silvey,
Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0143]

Proposed Extension of Existing Information Collection; Request for MSHA Individual Identification Number (MIIN)

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 [44 U.S.C. 3506(c)(2)(A)]. This program helps to assure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the extension of the information collection for Request for MSHA Individual Identification Number (MIIN).

DATES: All comments must be received by midnight Eastern Standard Time on February 15, 2011.

ADDRESSES: Comments must clearly be identified with the rule title and may be submitted to MSHA by any of the following methods:

(1) Electronic mail: zzMSHA-Comments@dol.gov.
(2) Facsimile: (202) 693–9441.
SUPPLEMENTARY INFORMATION:

I. Background

Section 101(a) of the Federal Mine Safety and Health Act of 1977 (Mine Act) requires the Secretary to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines. Under section 103(a)(2), authorized representatives of the Secretary of Labor or Secretary of Health and Human Services must make frequent inspections and investigations in coal or other mines each year for the purpose of gathering information with respect to mandatory health or safety standards.

The Mine Safety and Health Administration (MSHA) issues certifications, qualifications and approvals (licenses) to the nation’s miners to conduct specific work within the mines. Prior to the approval of this collection Social Security Numbers (SSNs) were used for tracking purposes within MSHA’s data processing systems, in the absence of other reliable identification systems. In the effort to reduce use of SSNs both by MSHA and third parties, MSHA has changed the process to one in which miners requiring a license or benefit from MSHA will register for an “MSHA Individual Identification Number” (MIIN).

This unique number is used in place of individual SSNs for all licensing requirements within MSHA. This process has allowed MSHA to discontinue the past practice of individuals supplying their personally identifiable information to instructors, states or other entities, which in turn supplied that information to MSHA. Miners needing a license or benefit from MSHA will need to register only one time to obtain their MIINs from MSHA.

II. Desired Focus of Comments

MSHA is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the FOR FURTHER INFORMATION CONTACT section of this notice, or viewed on the Internet by selecting “Rules & Regs”, and then selecting “FedRegDocs”. On the next screen, select “Paperwork Reduction Act Supporting Statement” to view documents supporting the Federal Register notice.

III. Current Actions

This request for collection of information contains notification and recordkeeping provisions for the Proposed Information Collection Request Submitted for Public Comment and Recommendations; Request for MSHA Individual Identification Number (MIIN). MSHA does not intend to publish the results from this information collection and is not seeking approval to either display or not display the expiration date for the OMB approval of this information collection.

There are no certification exceptions identified with this information collection and the collection of this information does not employ statistical methods.

Type of Review: Extension.
Agency: Mine Safety and Health Administration.
OMB Number: 1219–0143.
Frequency: On Occasion.
Affected Public: Business or other for-profit.
Cost to Federal Government: $132,784.
Total Burden Respondents: 11,000.
Total Number of Responses: 11,000.
Total Burden Hours: 916.
Total Hour Burden Cost (operating/maintaining): $38,696.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Patricia W. Silvey,

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0009]

Proposed Extension of Existing Information Collection; Training Plans and Records of Training

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 [44 U.S.C. 3506(c)(2)(A)]. This program helps to assure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the extension of the information collection for Training Plans and Records of Training, 30 CFR 48.3, 48.9, 48.23, and 48.29.

DATES: All comments must be received by midnight Eastern Standard Time on February 15, 2011.

ADDRESSES: Comments must clearly be identified with the rule title and may be submitted to MSHA by any of the following methods:

(1) Electronic mail: zzMSHA-Comments@dol.gov.
(2) Facsimile: (202) 693–9441.

For further information contact:

Mario Distasio, Chief of the Economic Analysis Division, Office of Standards, Regulations, and Variances, MSHA, at distasio.mario@dol.gov (e-mail), 202–693–9445 (voicemail), 202–693–9441 (facsimile).
SUPPORTING STATEMENT

Qualification/ Certification Program Request for MSHA Individual Identification Number (MIIN)

A. JUSTIFICATION

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of the information.

Section 101(a) of the Federal Mine Safety and Health Act of 1977 (Mine Act) requires the Secretary to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines. Under section 103(a)(2), authorized representatives of the Secretary of Labor or Secretary of Health and Human Services must make frequent inspections and investigations in coal or other mines each year for the purpose of gathering information with respect to mandatory health or safety standards.

The Mine Safety and Health Administration (MSHA) issues certifications, qualifications and approvals to the nation’s miners to conduct specific work within the mines. Miners requiring qualification or certification from MSHA will register for an “MSHA Individual Identification Number” (MIIN). This unique number is used in place of individual Social Security numbers (SSNs) for all MSHA collections. The MIIN identifier fulfills Executive Order 13402, Strengthening Federal Efforts Against Identity Theft, which requires Federal agencies to better secure government held data.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

The information collected, including name, address and SSN of the miner applicant is used to assign a new MIIN number which replaces the SSN for all MSHA identification of that miner. Miners needing a license or benefit from MSHA will need to register only one time to obtain their MIINs from MSHA.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means
of collection. Also describe any consideration of using information technology to reduce burden.

MSHA has made this form available for electronic submission at: http://www.msha.gov/forms/elawsforms/5000-46.htm. During calendar year 2011 MSHA received 18,163 requests for MIIN. Of these requests, 16,262 (or 90%) were received electronically. In 2012, 16,228 MIIN requests were processed, of which 14,605 (90%) being submitted electronically.

MSHA estimates that 16,000 MIIN’s will be requested annually. Of these requests, 90% will be submitted electronically.

MSHA also accepts faxed information and provides a toll-free number for individuals to request MIINs.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

There is no other similar information available to MSHA to identify individual miners.

In an effort to eliminate duplication, the MIIN is used across the MSHA systems in place of the SSN.

The following MSHA record collections, approved by OMB, also request a MIIN number.

(OMB No. 1210-0001) Certificate of Electrical Training, MSHA Form 5000-1
(OMB No. 1219-0009) Training Plans
(OMB No. 1219-0011) Dust Data Sampling Card
(OMB No. 1219-0127) Safety and Health Activity Certification or Hoisting Engineers Qualification Request, MSHA Form, 5000-41

These collections are required under 30 CFR Parts 48, 70, 71, 75, 77 and 90.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

This information collection does not have an impact on small businesses or other small entities. This collection of information is not being requested from mining operations, but from individuals applying to become approved, qualified or certified under 30 CFR Parts 48, 70, 71, 75, 77, and 90. Not all miners need to register for a MIIN -- only those that are seeking qualifications, certifications, or benefits.

6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.
MSHA created the MIIN to replace the use of SSNs as an individual identification number. This change was in keeping with E.O. 13402. Disapproval of this collection would restrict MSHA’s ability to verify if a miner is qualified or certified under existing standards.

7. Explain any special circumstances that would cause an information collection to be conducted in a manner:
* requiring respondents to report information to the agency more often than quarterly;
* requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
* requiring respondents to submit more than an original and two copies of any document;
* requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records, for more than three years;
* in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;
* requiring the use of a statistical data classification that has not been reviewed and approved by OMB;
* that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or
* requiring respondents to submit proprietary trade secrets, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information’s confidentiality to the extent permitted by law.

This collection of information is consistent with the guidelines in 5 CFR 1320.5.

8. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency’s notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden.

Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.

Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every 3 years - even if the collection of information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific
situation. These circumstances should be explained.

In accordance with 5 CFR 1320.8 (d), MSHA will publish the proposed information collection requirements in the Federal Register, notifying the public that these information collection requirements are being reviewed in accordance with the Paperwork Reduction Act of 1995, and giving interested persons 60 days to submit comments.

9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.

MSHA does not provide payments or gifts to respondents.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

The form notifies respondents that their information will be kept confidential to the extent required by law. The information collection includes Privacy Act material. The collected information also is protected under OMB Circular A-130, Management of Federal Information Resources, the Computer Fraud & Abuse Act of 1986, Department of Labor (DOL) policies covering Network Operations and LAN Management and DOL’s Privacy Policy on Data Collection over DOL Web Sites, and by the Federal Information Security Management Act (FISMA) of 2002, Title III, Public Law 107-347, as part of the E-Government Act of 2002.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

There are no questions of a sensitive nature.

12. Provide estimates of the hour burden of the collection of information. The statement should:
* Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.
* If this request for approval covers more than one form, provide separate hour
burden estimates for each form and aggregate the hour burdens.
* Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be under ‘Annual Cost to Federal Government’.

**MSHA Form 5000-46**
MSHA expects to receive annually approximately 16,000 applications (MSHA Form 5000-46) requesting MIINs. MSHA anticipates that, of the estimated 16,000 applications, 12,000 will be completed by miners and 4,000 will be completed by certified instructors. MSHA further estimates that the form (electronic, paper or phone call-in) will take an average of 5 minutes (.0833 hours), to complete. MSHA has calculated the average underground and surface coal miners' wage to be $38.10 per hour according to the 2012 U.S. Coal Mineral Mine Salaries, and the average wage of MSHA - approved instructors to be $62.25 per hour.

**Estimated Burden Hours for one year**

**Burden Hours:**
16,000 requests (MSHA Form 5000-46) x .0833 hours = 1,333 burden hours

**Burden Hour Cost:**
(12,000 miner requests x .0833 hours) x $38.10 = $38,085
(4,000 instructor requests x .0833 hours) x $62.25 = $20,742

Total burden hour cost = $58,827
Total responses = 16,000
Total respondents = 16,000

13. Provide an estimate for the total annual cost burden to respondents or recordkeepers resulting from the collection of information. (Do not include the cost of any hour burden already reflected on the burden worksheet).
* The cost estimate should be split into two components: (a) a total capital and start-up cost component (annualized over its expected useful life) and (b) a total operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information. Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.
* If cost estimates are expected to vary widely, agencies should present ranges of cost burdens and explain the reasons for the variance. The cost of purchasing or
contracting out information collections services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection, as appropriate.

* Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information or keep records for the government, or (4) as part of customary and usual business or private practices.

Cost Burden for one year

MSHA estimates that 1,600 applicants will mail forms to MSHA.

\[
1,600 \times \$0.47 \text{ postage} = \$752.00 \\
\text{Total Cost Burden} = \$752.00
\]

14. Provide estimates of annualized cost to the Federal government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from Items 12, 13, and 14 in a single table.

MSHA estimates the cost to operate and maintain MSHA’s MIIN system is based on: the annual operating cost for the MIIN system; the cost to process MSHA Form 5000-46 based on a GS 6 step 4 salary; and, the cost to mail MIIN information to miners.

**Government Costs for One Year:**

<table>
<thead>
<tr>
<th>Description</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual operating cost for MIIN System</td>
<td>$60,000</td>
</tr>
<tr>
<td>Cost to process MSHA Form 5000-46</td>
<td>$41,208</td>
</tr>
<tr>
<td>Cost to Mail MIIN Information to Miner</td>
<td>$14,700</td>
</tr>
<tr>
<td><strong>Total Cost to Federal Government</strong></td>
<td>$115,908</td>
</tr>
</tbody>
</table>

15. Explain the reasons for any program changes or adjustments reported on the burden worksheet.
16. For collections of information whose results will be published, outline plans for tabulation, and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates and other actions.

MSHA has no plans to publish the information obtained through this information collection.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

MSHA will display the expiration date on any instruments (MSHA Form 5000-46).

18. Explain each exception to the topics of the certification statement identified in "Certification for Paperwork Reduction Act Submissions."

There are no certification exceptions identified with this information collection.

B. Collection of Information Employment Statistical Methods

This information collection does not employ statistical methods.
