27. Description of Accident (include equipment involved, the exact location in the mine, and status of rescue and recovery operations):

At approximately 5:40 A.M. the victim was operating the continuous miner on the 001 MMU, mining the roof in preparation for the installation of a belt conveyor drive. The victim stepped approximately 8 feet in by the last row of permanent roof support, apparently to view the roof line that he had established. A section of the unsupported roof approximately 6 1/2 feet long by 6 feet wide by up to 8 inches thick fell striking the victim and pinning him to the mine floor. The other miners on the crew set wooden timbers to support the area up to the victim. The rock was lifted with a jack from the emergency roof supply sled and the victim was extricated. He was placed on a backboard stretcher and transported to the surface via rubber tired buggy and rail mantrip. Claiborne County Ambulance Service was on the surface and transported the victim to the Claiborne County Hospital where he was pronounced dead.

The information provided in this notice is based on preliminary data ONLY and does not represent final determinations regarding the nature of the incident or conclusions regarding the cause of the accident.
