

HEALTH ALERT **Stop Hearing Loss**

Best Practices:

- Design workplace environments to ensure compliance with the permissible exposure level.
- Engineering controls reduce noise at its source. This includes:
 - exhaust mufflers;
 - enclosures and booths;
 - shields and barriers; and
 - environmental cabs for mobile equipment.
- Maintain equipment per manufacturer's recommendations.
- Provide hearing protection; ensure the hearing protection is fitted and maintained in accordance with manufacturer's instructions.
- Turn off noisy equipment when not in use.
