

## Fatality Alert

MINE FATALITY – On June 20, 2022, a 50 year-old miner died when the excavator he was operating underground slid over an elevated loading pad and was engulfed by lime dust.

### Best Practices

- **Conduct workplace examinations** prior to beginning work and assure hazards are corrected.
- **Train miners to identify and report hazards** and stay clear of potentially unstable areas.

This is the 15th fatality reported in 2022, and the fifth classified as “Machinery.”
