

Fatality Alert

MINE FATALITY – On October 28, 2025, a miner died after the haul truck he was driving went over a berm along the haul road and into a water-filled pit.

Best Practices

- Always operate mobile equipment at safe speeds. Consider the roadways, tracks, grades, clearances, visibility, traffic, and type of equipment used.
- Ensure berms and guardrails are at least mid-axle height of the largest mobile equipment using the roadway.
- Follow the Surface Mobile Equipment Safety Program at your mine.
- Always wear a seatbelt while operating mobile equipment. Never attempt to exit or jump from an out-of-control vehicle.
- Perform pre-operational examinations of mobile equipment.

This is the 26th fatality reported in 2025, and the 11th classified as “Powered Haulage.”

The information provided in this notice is based on preliminary information only and does not represent final determinations regarding the nature of the accident or conclusions regarding the cause of the fatality.
