

Fatality Alert

MINE FATALITY – On April 30, 2026, a miner died while filling an uncoupled water tank semi-trailer when it overturned.

Best Practices

- Park mobile equipment and trailers on level ground and properly chock the wheels before beginning any task.
- Ensure landing gear of trailers is firmly positioned on stable support.
- Conduct examinations of equipment and correct potentially hazardous conditions prior to performing tasks.
- Never work on or near equipment that could move unexpectedly; secure equipment against rolling or shifting.
- Train miners in the safe performance of their tasks.

This is the ninth fatality reported in 2026, and the first classified as “Non-Powered Haulage.”

The information provided in this notice is based on preliminary information only and does not represent final determinations regarding the nature of the accident or conclusions regarding the cause of the fatality.
