

## Fatality Alert

MINE FATALITY – On November 6, 2025, a miner died when the scoop he was operating was struck by the lead locomotive of a supply trip.

### Best Practices

- Operate mobile equipment at safe speeds appropriate for the grade, load, and track conditions. Select the proper gear before descending grades to maintain positive control.
- Conduct thorough pre-operational examinations of all mobile equipment. Test brake systems, sanders, and communication devices before use and ensure they work properly.
- Establish and follow communication protocols that require verification for all mobile equipment operators.
- Make sure miners communicate their location and intended movements with the dispatcher.

This is the 27<sup>th</sup> fatality reported in 2025, and the 12<sup>th</sup> classified as “Powered Haulage.”

The information provided in this notice is based on preliminary information only and does not represent final determinations regarding the nature of the accident or conclusions regarding the cause of the fatality.
