**27. Description of Accident (include equipment involved, the exact location in the mine, and status and recovery operations)**

Contractors were making repairs to the impoundment dam. Contractor (owner) came back to site with lunch. The dozer had seen the owner's truck pull up and assumed the owner had stayed in the cab as he was backing up the hill to retrieve his lunch. The owner(victim) had gotten out of the truck with the lunches and stopped to spot the dump truck. The victim stepped to the side to allow the truck to dump and stepped directly into the path of the dozer. The dozer operator realized he had run over the victim when he saw the pant leg and boot in the dozer tracks.

The information provided in this notice is based on preliminary data only and does not represent final determination regarding the nature of the incident or conclusions regarding the cause of the accident.
