Fatality Alert

MINE FATALITY – On October 13, 2020, a miner died after being struck by a battery-powered scoop. He had parked his shuttle car in an intersection and was exiting when a scoop went through a ventilation curtain in an adjacent crosscut and struck him.

Best Practices

- **Install and maintain proximity detection systems** on mobile section equipment.
- **Use transparent curtains for ventilation controls** on working sections.
- **Communicate** your presence and intended movements. Wait until miners acknowledge your message before moving your equipment.
- **STOP and SOUND an audible warning device** before tramming equipment through ventilation curtains.
- **Avoid areas where equipment operators cannot readily see you.**
- **Wear personal strobe light devices to increase visibility.**

This is the 19th fatality reported in 2020 and the fourth classified as “Powered Haulage.”

The information provided in this notice is based on preliminary data only and does not represent final determinations regarding the nature of the incident or conclusions regarding the cause of the fatality.
