One thing that would help is to simplify the ROPs/Seatbelt language. Basically this language was established when seat belts were not even required on our public roadways. This is why the current language is a bit misleading on when seatbelts should be worn.

Here is the simple language:

"Seatbelts are to be provided on all mobile equipment used and shall be worn at all times when mobile equipment is in use."

This section could easily be simplified and most of the standard could be taken out and possible put under PPM.

I would be happy to go into more detail if needed.
