

Examination of Working Places

Location:	Date:
------------------	--------------

Working places must be examined at least once each shift, before work begins or as miners begin work in that place. Record ALL conditions found on entire shift.

--------------------------	--

A competent person should be Task Trained to recognize hazards and conditions that are expected or known to occur in a specific work area

Location of all areas examined: Mark 'CAN' box if "Corrective Action Needed" is found. IF conditions that may adversely affect safety or health cannot be corrected before miners are potentially exposed the miners must be promptly notified of the condition

Examination of Working Places

Definitions and explanations:

- *A continuing adverse condition does not need to be recorded on each shift as per MSHA guidance document (FAQ).
- *A working place would not include roads not directly involved in the mining process, administrative office buildings, parking lots, lunchrooms, toilet facilities, or inactive storage areas as per MSHA guidance documents (FAQ and Fact Sheet).
- * “Promptly” means conditions that are corrected by the end of that shift.
