

Diesel Exhaust Health Effects Partnership Meeting – 9/19/17

A Mine Safety and Health Administration/National Institute for Occupational Safety and Health Diesel Exhaust Health Effects Partnership stakeholder meeting will be held on Tuesday, September 19, 2017. The meeting will be held at the MSHA Approval and Certification Center on 765 Technology Drive in Triadelphia, WV 26059. Participants may also attend virtually.

The MSHA/NIOSH partnership provides a forum for the exchange of scientific findings on the health effects of diesel exhaust and for a review of approaches that may enhance control of diesel exhaust exposures to improve protections for miners in underground coal and metal and nonmetal mines.

The meeting will begin at 11:00 am with a short stakeholder session to discuss MSHA enforcement issues. The diesel partnership session will begin at 1:30 pm focusing on comments and other information received as a result of the Request for Information on controlling the diesel exhaust exposures in underground mines. There will also be a presentation on best practices for reducing diesel particulate production and exposures to miners.

Please [RSVP here](#). If you plan to attend in person, an RSVP is required.

Additional logistical details on attending remotely (including applicable MSHA local office videoteleconference locations) will be made available later.
