New Mexico Mine Health and Safety

20/20 FORESIGHT

May 13th - 15th
2020

Hindsight is 20/20. We've all heard that wisdom—usually after a serious incident. But why can't foresight be clearer, allowing us to predict what could occur and prevent serious incidents in the workplace and at home.

Improved practices involving pre-job planning, compliance with safety and health rules, thorough risk assessment and clear communication can improve our foresight capabilities. When recognized and acted upon, such foresight can lead to a healthier and safer experience. The New Mexico Mine Health and Safety Conference (NMMHSC) is dedicated to extending those tools to you that will enhance your foresight capabilities.
