

National Lime Association Annual Conference

Arlington, VA

June 11, 2019

David G. Zatezalo
Assistant Secretary of Labor
Mine Safety and Health Administration

The MSHA Mission

“to prevent death, illness, and injury from mining and promote safe and healthful workplaces for U.S. miners”

MSHA's Tools

- Fair and consistent enforcement, including mandated inspections
- Compliance and technical assistance
- Training and education
- Rulemaking and policy guidance

MSHA's Mine Portfolio

Trailing 4 Quarters, 2018 Q2 – 2019 Q1

Mine Type	Number of Mines	Share of Total
UG Coal Only	422	3%
UG MNM Only	239	1.7%
UG Total	661	4.7%
All Surface	12,416	89.1%
Facilities	859	6.2%

2018 Data: Lime Ind. & All Mining

	LIME INDUSTRY	NATION
# of Mines Reporting Employment	60**	13,055
- Coal Mines Only	0	1,192
- Metal/Nonmetal Mines Only	60	11,863
Total Operator Employment*	3,837	331,933
MSHA E01 Inspections Completed	127	19,213
Citations & Orders Issued	1,027	97,788
Dollars Assessed	\$490K	\$54.5

*The Nation's total employment, including contractors is 331,933. Given contractor data limitations, a similar breakout of employment inclusive of contractors cannot be provided for the lime industry.

**Lime commodity only.

ALL INJURY RATES & FATALITIES (CY 2008 – 2019*)

As of 6/10/2019

All Mining Fatalities 1912-2018

Powered Haulage Safety Initiative

Powered Haulage accidents were responsible for 50% of fatalities in recent years; 13 of 27 (48%) in 2018

Preventing these accidents is a priority for MSHA, with a focus on:

- Mobile Equipment
- Belt Conveyors
- Seat Belt Safety

View from the Operator's Cab

Actual Activity on the Ground

Large vehicles striking other vehicles or pedestrians have killed 24 miners since 2003

Belt Conveyors

- Seven miners killed working around belt conveyors since January 2017; four in coal, three in MNM
- Since 2008, 19 fatalities and more than 40 permanent injuries
- Guarding, lock-out tag-out, properly using crossovers - all essential for safety

Seat Belt Safety

- Three fatalities in 2017 and 2018, and 38 fatalities since 2007, involved miners not wearing seat belts
- 6000+ MSHA citations issued for failure to wear seatbelts since 2007 (most in MNM mines)

Powered Haulage Safety Outreach

We are distributing stickers, brochures and more to spread the word

Fire Suppression Failures

- In 2018, four mobile equipment fires in one month; fire suppression systems failed in all
- One miner killed, another injured
- Fire suppression equipment must be properly installed
- Miners should have a means to escape
- MSHA has inspected mine mobile equipment for effective suppression systems

One MSHA Initiative

- Blurring the distinction between Coal and Metal/Nonmetal enforcement for more efficient use of resources
- Cross training inspectors and updating systems to accommodate change where it makes sense
- Inspector expertise still required for certain mines
- Moving to Phase 2 with an additional 117 mines

Scofflaw Initiative

- Small share of operators are chronically delinquent and have poor safety records; worst violators selected each month
- Payment plans proposed/established or operator paid in full with total commitment of \$7.2 million
- 26 mines paid in full for \$1.8 million
- 45 104(a) citations issued; 22 104(b) orders issued, but none currently active

In Summary: MSHA Today & Tomorrow

- Health Focus
- Regulatory Review
 - Dust
 - Diesel Emissions
 - Powered Haulage
