

# Close the Cab!

**Cab door is closed**

**Cab door is open**

## Before beginning work, don't forget to:

- Check the door and window seals.
- Dust off your clothes before entering the cab.
- Keep the cab door closed.
- Replace dirty filters.

## Why is it important to make sure the cab door is closed and properly sealed when operating mining equipment?

An enclosed cab with an air filtration system separates a miner from silica dust sources and provides clean air, protecting them from the harmful impacts of silica dust.
