27. Description of Accident (include equipment involved, the exact location in the mine, and status of rescue and recovery operations):

On November 17, 2014, Robert Arnold Fleenor, a 63-year-old truck driver, missed the last step while climbing down the ladder of his haul truck. He hit the tire of the haul truck and then slid down the tire and hit his head on the concrete. Several hours later, he complained of not feeling well, and was subsequently found unresponsive behind the steering wheel of his truck. He was transported to a hospital, where he died on November 27, 2014. The death certificate and autopsy report both indicated that the manner of death was accidental, and the cause of death was a left cerebral infarction due to left subdural hematoma. Based on the findings of the death certificate, the autopsy report, and the MSHA investigation, the committee members concluded that his death should be charged to the mining industry.

The information provided in this notice is based on preliminary data ONLY and does not represent final determinations regarding the nature of the incident or conclusions regarding the cause of the accident.
